INTEGRATED SOLUTIONS

Access Control | Intruder Detection | Security Management

Inner Range began designing and manufacturing integrated Security and Access Control systems in 1988. Today there are more than 120,000 installed Inner Range systems delivering state-of-the-art solutions to corporations, government departments and institutions all around the globe.

All these organisations rely on their Inner Range systems, great and small, to secure and manage their critical assets.

The Inner Range research centre in Melbourne, Australia is home to a large engineering and product development team which is supported by an even larger complement of dedicated test engineers, trainers and IT technical support specialists.

The Inner Range Europe facility in Reading, UK provides marketing, and product supply for this region as well as technical support services in that time zone.

Inner Range products are sold around the world by a network of authorised distributors who are committed to standards of service that reflect Inner Range's commitment to excellence.

The Integriti Technology Platform

Affordable on any Scale

Integriti delivers a state-of-the-art solution with tangible cost savings through its integrated Security, Access Control and Building Automation functionality.

Scalability

Integriti is perfect for small sites through to large multi-campus institutions. Only pay for what you want when it's needed; Integriti's flexible modular design means it grows with demand as required. And because it's an IP-based networked solution, utilise new or existing I.T. infrastructure for boundless connectivity.

Simplicity of Use

Large or small, everyday use of the Integriti system is simple. Unlock doors, turn on or off security areas all by simply presenting a card at a reader or by using the colour graphic keypad. Manage the entire system via intuitive Windows® based software.

**Contemporary Design -
Inner Range SIFER Card
Reader & Keypad**

Use the Integriti system to:

Monitor and control the movement of all personnel and vehicles in the facility. Protect critical assets and manage the safety of staff and visitors.

Easily assign access permissions mandating who can go where and when, including visitor access.

Manage the reporting of security alarms and audit their responses.

Ensure compliance with business systems and government regulations.

Respond to emergency situations, lockdowns and alerts.

Manage OH&S liability by utilising competency based access control.

Remotely monitor and control the Integriti system with iOS and Android Apps.

Manage the entire security operation from a single user interface. With Integriti acting as the complete Security Management System, integrate a variety of security sub-systems, such as CCTV, Biometrics, Mobile Duress, Lighting, Air-Conditioning, Inter-com, Fire and many more.

The Software

The Integrati System Management Suite is a true cutting-edge solution. Featuring the very latest technologies, Integrati has been designed from the ground up for the Internet age.

Integrati software adheres to current I.T. industry best practices, empowering system administrators to leverage the very latest computer hardware and virtual machine environments, without restrictions, without caveats and without excuses.

Integrati Software starts with the Express edition for small sites, offering everything you will need for basic system management. The incredibly flexible user permissions and Integrati GateKeeper application provide a convenient customer focused approach to system operation and management. The lightening quick search functions will present your results in an instant. Integrati Express is designed to be used on a single computer.

For medium sized sites, upgrade to Integrati Professional edition and you have a network capable system with real grunt. Large system dimensions, drill down schematic maps, multiple workstations, integration options with existing HR systems and a range of third party products, plus a host of other innovative features that redefine the meaning of "System Management".

For enterprise systems, make use of Integrati's multi-site architecture. Integrati may be deployed on any number of individual sites with offline autonomy, whilst system users and permissions are managed globally. A full range of optional Integrati software modules is available to satisfy the administrative needs of even the most demanding of organisations.

Software features at a glance ...

Build cardholder profiles by assigning multiple permissions with simple "Allow" or "Deny" functions.

Modern design, intuitive and simple to use.

Complete alarm management with powerful automated actions.

Rich graphics with interactive floor plans and maps.

Forensic audit trail recording every programming change with ability to "roll-back" any change.

Email, SMS text messaging and pager communications.

Easy-to-use reporting such as Time on Site, Muster and a whole lot more.

Integration with Active Directory, HR, payroll and other database applications.

PhotoID card design and printing.

Client/Server architecture, fully compatible with all modern computing platforms using Microsoft SQL databases.

Integration with other systems: CCTV, Intercoms, Building Automation, Personnel Tracking, Mobile Duress and many more. Use Integrati as an over-arching Security Management System for complete control of security and facility services.

Remote Access To Your System

Apple and Android Apps

The Integriti Mobile and SkyCommand Apps pack a powerful punch of accessibility and control for your Integriti Security and Access Control system. With the tap of a finger, these exciting Apps allow remote operation of your Integriti system from anywhere in the world!

SkyTunnel

SkyTunnel is an industry-first cloud based service that provides hassle free connection of Integriti hardware, software and Integriti mobile Apps over the internet.

No more wasted hours configuring routers and ports.

Healthy Choices 101

The recent \$2B Sunshine Coast University Hospital major government infrastructure project deployed Integriti as the platform of choice. Integriti provides access control for thousands of doors, security monitoring for thousands of alarm inputs and, most importantly, a sophisticated integrated security management system supporting 16 concurrent high-level interfaces (CCTV, Intercom, BMS, Fire, RTLS, KeyLocker, Lifts, Nurse Call and more). This solidifies the installation as one of the most significant electronic security integration projects in the past 10 years. Healthy choices, continuing rewards.

And it just makes good business sense ...

Integriti, whilst feature complete, is at the early stages of its product development life-cycle. Your return on investment is optimised as the typical operational life-expectancy of an Inner Range system is measured in decades.

The Integriti system can share cardholder data with your company's Active Directory, Employee Database, Payroll System, Student Database or Booking System to reduce the labour costs associated with data entry and cardholder record management.

Integriti boasts powerful, yet intuitive, cardholder permission programming. The use of "Allow" and "Deny" functions greatly simplify system administration. Operator training, and associated costs, are minimal.

Integriti supports a wide range of non-proprietary cards, readers, locks, detectors and other peripheral devices. You are not locked into buying the manufacturers specific consumables or peripheral components. A choice of vendors gives you the competitive advantage.

Detailed forensic Audit of Operator actions and programming changes, with ability to "roll-back" to any historic point.

Integriti is a non-proprietary system. You have a wide choice of competent security companies from which to choose. Refer to the Inner Range website for the details of recommended companies.

Integriti includes a feature-rich suite of tools such as graphical maps, powerful reporting, card printing, alarm management, compliance based access control, email/SMS/pager communications and much, much more.

Inner Range does not impose annual license fees or mandatory Software Maintenance Agreements. Consider the Total Cost of Ownership over the system's lifetime when comparing an Inner Range system to others. You'll be pleasantly surprised.

The Integriti system enables cardholder location and activity information to be shared with Building Management Systems, Air-Conditioning and Lighting systems to reduce the energy costs associated with these services. This represents real cost savings to the business.

Mobile Apps for Apple and Android are available for remote monitoring and control.
